大謙建築在設計的初始就是從建築、景觀及室內的整體設計，甚至將地點的空間、位置和大小也同時考慮。常常因此造成空間內外相互關聯，就像一首空間中連續的詩篇。

幾何的大廳以大雨時鐘聲及半穿透的元素營造內外空間的關聯，而以球形吊燈成為空間的焦點。室內空間以白色及大地棕色為基調，以簡潔的空間設計原則，及豐富的材料紋理及質感，營造多樣的表情。

The design process was integrated with the landscape, the architecture and the interior design, constantly the space and location of down work of art are deliberated as well. The sequence of exterior and interior spaces are linked and responding to resemble poetry of spaces.

The high-ceiling entrance hall relates the exterior to the interior with transparent and translucent material, in addition, set the spherical pendant light as the focus of the void space. The principle of the project is to design plain spaces with white and earth tone; however, vivify the atmosphere of the spaces with various pattern and texture of material.
