開放式廚房結合餐桌成一字型狀，所相襯的餐廳主牆運用水泥粉光整合木皮和烤漆玻璃，營造不同色感層次變化，其寬窄不一的立面分割讓右側放置冰箱的通風處有了線性切口的設計表現。

The open kitchen is combined with the long dining table. Considered the pillar, we try to spilt the faⓍade into several sizes, and adopt cement finished, veneer, andpainted glass three materials. The cement finished wall is the ground color of this house. Besides, we use uneven dyed veneer in order to create colorful main wall
with various texture and colors.

利用白色來掩飾既有的零碎區塊，以重至輕的整體配色，從下層的黑色木地板開始，到上層的白色木地板，於黑灰白之間置入粉紅色調的傢俱物件；而上層的兩間臥室分別依照使用者設定不同色系主題。

White is a color that can cover up some fragmented blocks, so we use white to be the main color on the wall. Then we choose black to be the color of floorings. From top to the bottom, the color is from light to dark. Besides, pink furniture dots the space and vitalizes the house. On the second floor, each bedroom has theme settings of color configuration.
