IAI-34-鼓勵好室

當溫室成為一個家 在鼓勵好室中，高功率的溫室環境與都市生活型態交融混合，構築成未來家屋的原型。試想在潮濕涼爽的蕨類溫室中飲茶談天，在高科技室內農場中摘採蔬果，下廚用餐，在溫暖濕潤的蘑菇溫室中用五感品味一場未來劇場。在這些奇妙的「溫室」中，我們將經驗植物世界與人類生活交織共存的生活情境，用感官與想像力從新理解生活與農業環境間的共生平衡。

IAI-34-Greenhouse

Greenhouse as a home. In the 'Greenhouse', the modern high-tech greenhouse environment fuses with the urban lifestyle and forms the prototype of future living. Here one could drink tea and chat with friends in the cool and moist fern room, pick fresh vegetables indoor and cook delicious meal with them, or enjoy a futuristic light theatre with all five senses in the fungus farm. Going through these magical greenhouses, we experience a living environment where plants cohabitate with human, and learn the subtle equilibrium of life and agriculture.
