RS-S-181-文德高宅

把空間場域（玄關、健身房、餐廳、客廳、遊戲室）弱化，使空間達到共享，使得家人再進行活動時，能互相分享，而介面大量使用氟酸玻璃，使週遭色彩及戶外山景綠蔭映再氟酸玻璃上，使得量體的介面虛化成為天然畫布，一方面放大空間，一方面增加空間調性達到業主所要求的科技感。由於個案有一整道弧型的對外窗，所以我們在窗戶邊都做個休憩平台，最特別的是我們把平台跟沙發整合成小孩眼中的堡壘，任由他翻、滾、跑、跳。床架也別於一般，做口字型包覆的設計，一方面可增加小孩的安全感，方便訓練小孩獨立，一方面增加收納空間。走道上做地坪分割，使得空間更加延續。入口玄關燈結合了單槓的功能，不只解決業主在家健身的需求，也創造出這案場的特殊性。

RS-S-181-Wende K

The space (entrance, gymnasium, restaurant, living room, and playroom) is weakened to make it available shared with others available for the activities engaged by family members. The interface is mostly designed with hydrofluoric acid glasses to make surrounding colors well matching with green mountain views outdoors when outdoor scenery colors are reflected on glasses. Body interface is virtualized into a natural canvas. On one hand, it can be used to enlarge space, and on the other hand, it can intensify the technical sense required by the owner. Because this design project is designed with a whole arc of window facing outside, we construct a rest platform beside the window. What the most special part is we integrate this platform with sofas to make them become a fortress for children allowable for turning, rolling, running and jumping at will. Bedsteads are also especially designed with a shape of square-framed enclosure. On one hand, it can make children feel safer to cultivate their independence. On the other hand, it can enlarge storage space. The floor is divided to make space with much more continuation. The entrance porch light is combined with the function of a horizontal bar. It does not only meet the needs of the owner's fitness exercise at home, but also creates spatial particularity.
