## 幼橘園

德國教育家福祿貝爾說：幼稚園的真諦，是孩子的遊樂園。強調獨立、有限度的自由，並注重生心理的成長，讓孩子能探索世界及交流。因此幼橘園的誕生從減法設計、使用者經驗及兒童認知發展理論等設計理念，創造出讓孩子發揮更好學習成效的殿堂。減法設計以學習者為主體思維，讓教育環境設計的形式語言降至最低。不以過多成人思維角度的圖像裝飾，俗豔的色彩質地，光滑塑膠質感；而以極簡中性的元素（灰白色，淺色木紋作為空間色彩的基底，低對比的色彩計畫）強調空間的多元組合與開放性。讓孩子與教育現場發生的人事物成為空間的主角。使用者經驗：讓孩子玩樂與探索，每天都迫不及待想去的環境。實用與彈性讓老師方便多元教學，並獲得互動的成就感。取得家長信任，讓家長感覺幸福的福利。兒童認知發展是針對老師與教材的設計思考。以操場的概念，循環式環形跑道圍繞著中央教室範圍作為主配置、運用多元的戶外空間、植栽等層面規劃設計。並採取靈活的玻璃隔間方式，展開時可成為通透的大教室，可集體創作，共同遊玩；關起門則可分類教學。幼橘園是一座擁有無限可能的樂園，在此學習、運動、成長。孩子之間不需要玩具就能玩得很開心，因為在這裡，孩子都能找到屬於自己的空間和舞台。

## Orange Kindergarten

The founder of kindergarten, a German educationist Friedrich Fröbel once said “Play is the highest expression of human development in childhood for it alone is the free expression of what is in a child's soul”. That's why the creation/design of “Gamma Garden” was based on subtractive design, user experience, and children's understanding and development to generate a place for children where they could maximize their learning effectiveness. The subtractive design is mainly based on the principle learner as its core value, to minimize the educational environment design language formation. Eliminate the usage of adult hood perspective thinking related decoration or images, gingerbread color texture, or smooth plastic texture; instead using neutral minimalist criteria (light grey, light wood grain as the color design foundation, with low color comparison plan) focusing on the space flexibility and openness. Making children and other people、event、substance that took place here the protagonist of the space. User experiences: Letting children play and explore, an environment where they just can't wait to be at daily. Being both practical and flexible simply makes it much easier for teachers to illustrate multi-teaching methods, and able to receive interactive sense of achievement. Gaining trust from parents, and as a benefit provide them with the feeling of happiness. Children's cognitive development focuses on the design thinking of teacher and course material. Base on the concept of sports field/ playground, the toroidal runway design surrounded the center classroom, making it a multi-functional exterior space, garden design and other design aspects. Adopting the flexibilities of glass gratings, which transforms the classroom into a semi-open space when expanding/opening the gratings for various group activities and closing them for private sessions/lessons. Gamma Garden is an amusement park/playground of infinite possibilities; a place for education, sports, and growths. Toys are unnecessary for children to enjoy and have fun, because this is the place where children can establish/find their personal space and stage to shine.
