楊宅	Yang house
<p>富有手感的水泥塗料是來自於手感的溫度，加上色感的拿捏與量體的比例，活潑了空間。客廳中的隔柵量體扮演了指揮家，操縱著公共空間的開放與私密性，掌握了機能，動線與光線的佈局。打開拉門放大了客餐廳聚會場所的尺度，在客人到訪借宿時，便是個完整的小客房。一道軸線上，一邊是沉靜的白色量體，一邊是活潑的木質紋理，將空間中的畫面劃分開來，運用優雅的弧形倒角，柔和了原有銳利的牆角，也使得立面產生了同樣的表情語彙。在軸線的端景透過鏡面的佈局，強化了空間延伸感。</p>	<p>The rich texture of the concrete coating comes from the temperature of the texture. Combining that with the right proportion of the control of color sense and volume, the space comes to life. The grilled partitions of volume in the living room serve as a conductor who manipulates the openness and privacy of this public space and takes hold of the layout of functions, flow line, and light. When the sliding door is opened, it enlarges the scale of the dining hall where gatherings take place. It can play the role of a guest house when you have friends staying over. The two sides of the axis are equally occupied by serene and white volume and vibrant wooden grains, separating the scene in the space. Elegant reverse arcs are used to soften the original sharp wall angles and create the same expression on the façade. Mirrors are planned at the end view of the axis to strengthen the extension of space.</p>
