

流動向量

充滿流動感的向量，攪破空間與生活介面的局限，那一筆一畫看似簡潔，卻是設計之於生活；一份由衷虔誠的頂禮。萃取 U 形的元素來串聯各項機能單元。弧曲造型的餐桌可兼做休閒吧檯、工作區、洽談區，弧形元素吊燈陪襯，桌面轉彎的長度，延伸量體在空間中的視覺感受尺度，U 形若微笑，就像歡迎回家的溫暖語彙!!

空間中遍佈講究的工藝細節，像是玄關處玫瑰金吊衣桿、安置暫放的外出服、提包，下方搭配同色系拉抽把手，以微笑元素整合雙色餐桌、周邊家具、燈具，兼具機趣與設計品味，所搭配的各式家具無論形體、機能皆擁有變化彈性，以符合空間比例邏輯、舒適性和人體工學。

Flowing Vector

The flowing vector breaks the limits of space and life interface. The seemingly simple patterns are in fact designs of life as well as the faithful prostration. The extracted U-shaped element connects each mechanical unit. The table in arc-curve shape can be used for leisure, for work, and as a meeting area. Such is set off by the arc-shaped chandelier, and the curving length of the table extends the visual scale of the volume in space. The U shape is like a smile and a warm term of “welcome home.”

Elegant crafting details are spread across the space, such as the rose gold clothes rail as well as daytime dress and bag put aside. The lower part includes handles in the same color style, integrating dual-colored table, surrounding furniture, and lamps with the smiling elements. Such contains both amusement and designing taste, and all furniture has flexibility regardless of shapes or functions in order to meet the spatial proportion logic, and comfort performance, and ergonomics.
